Volume 32

July—December 1950, Inclusive

Feature editorial matter from Volume 32 of MATERIALS & METHODS covering issues from July through December 1950 is indexed here. Material covered in the index includes feature articles, MATERIALS & METHODS Manuals, and Engineering File Facts.

Aluminum and Its Alloys:

Chromium Is Plated Directly on Aluminum by New Process—Oct., p. 56
Cold Pressure Welding, Latest Developments in Widen Its Field of Application—Nov., p. 78
Copper-Bearing, High-Strength Wrought Aluminum Alloys (File Facts)—Dec., p. 83
Extruded Metal Shapes and Their Uses (MATERIALS & METHODS Manual)—Aug., p. 65
Mechanical Finishing of Metals—for Decorative Purposes (MATERIALS & METHODS Manual)—Nov., p. 81
Metal Parts with High Accuracy and Finish Produced by New Casting Process—Aug., p. 43
New Hard Coating Gains Wear Applications for Aluminum—Aug., p. 62
Welding Electrodes and Rods for Ferrous and Nonferrous Metals (MATERIALS & METHODS Manual)—Dec., p. 67
...ate Welding Cuts Costs in Fabrication of Many Products—Sept., p. 56

...azing (see Welding)

...astings and Casting:

Copper-Base Casting Alloys Are Used in Electrical Industry, How—Dec., p. 57
Engineering Properties of Iron Castings Can Be Improved by Heat Treatment—Dec., p. 50
Hard Surfaced Casting for Giant Bit—Nov., p. 138
Heat Resistant Castings—Their Selection and Application (MATERIALS & METHODS Manual)—Oct., p. 79
Metal Parts with High Accuracy and Finish Produced by New Casting Process—Aug., p. 43
Plastic Patterns Cut Investment-Casting Cost—Nov., p. 136
Precision Investment Castings Replace Parts Produced by Other Methods—Sept., p. 49
Precision Investment Nonferrous Casting Alloys (File Fact)—Nov., pp. 97, 99
Precision Investment Steel Casting Alloys (File Fact)—Aug., pp. 77, 79
...eramics for Engineering Applications (MATERIALS & METHODS Manual)—Sept., p. 69

...leaning and Finishing:

Chromium Is Plated Directly on Aluminum by New Process—Oct., p. 56
Finishes Successfully Baked on Nonferrous Products by Induction Heating—Sept., p. 60
Hot Spraying Industrial Organic Finishes, Time, Labor and Materials Saved by—Dec., p. 54
Mechanical Finishing of Metals—for Decorative Purposes (MATERIALS & METHODS Manual)—Nov., p. 81
Pickling Brittleness in Stainless Steels, How to Reduce—Nov., p. 74
Pickling Causes Brittleness in Stainless Steels, Research Shows How—Oct., p. 58
Salt Baths Perform Variety of Cleaning Jobs on Most Metals—July, p. 60

...oatings and Finishes:

Chromium Is Plated Directly on Aluminum by New Process—Oct., p. 56
Hot Spraying Industrial Organic Finishes, Time, Labor and Materials Saved by—Dec., p. 54
Mechanical Finishing of Metals—for Decorative Purposes (MATERIALS & METHODS Manual)—Nov., p. 81
Mica Base Paint System Withstands Severe Atmospheric Conditions, New—Nov., p. 58
New Hard Coating Gains Wear Applications for Aluminum—Aug., p. 62
Wrinkle Finishes Provide Attractive Durable Coatings—July, p. 65
...old Pressure Welding, Latest Developments in Widen Its Field of Application—Nov., p. 78
...ompression-Formed Steel Tubing Offers Close Tolerances and High Strength Properties—Aug., p. 52
Contact Welding, Speed and Uniformity in Joining Steel Provided by—July, p. 55
Copper Alloys, Tool and Temper Know-How Solve Forming Problems on—July, p. 58
Copper-Base Casting Alloys Are Used in Electrical Industry, How—Dec., p. 57
Copper-Bearing, High-Strength Wrought Aluminum Alloys (File Fact)—Dec., p. 83

Copper, Brass and Bronze:

Copper Alloys, Tool and Temper Know-How Solve Forming Problems on—July, p. 58
Copper-Base Casting Alloys Are Used in Electrical Industry, How—Dec., p. 57
Extruded Metal Shapes and Their Uses (MATERIALS & METHODS Manual)—Aug., p. 65
How to Weld Corrosion Resistant Materials—Aug., p. 60
Mechanical Finishing of Metals—for Decorative Purposes (MATERIALS & METHODS Manual)—Nov., p. 81
Metal Parts with High Accuracy and Finish Produced by New Casting Process—Aug., p. 43
Welding Electrodes and Rods for Ferrous and Nonferrous Metals (MATERIALS & METHODS Manual)—Dec., p. 67
Wrought Tin and Aluminum Brasses (File Fact)—Sept., p. 85
Electrolytic Iron Powder, A New—Sept., p. 136

Engineering File Facts:

Copper-Bearing, High-Strength Wrought Aluminum Alloys—Dec., p. 83
Nickel-Chromium-Molybdenum Steels—Sept., p. 87
Precision Investment Nonferrous Casting Alloys—Nov., pp. 97, 99
Precision Investment Steel Casting Alloys—Aug., pp. 77, 79
Recommended Carbide Grades for Various Applications—Dec., p. 85
Teflon Plastic—Aug., p. 81
Testing Machines (Tension and/or Compression), Means of Regulating Testing Speed—July, p. 73
Titanium Metal, Corrosion Resistance in a Number of Chemical Reagents—July, p. 75
Wrought Tin and Aluminum Brasses—Sept., p. 85
Zinc Alloys, Cast—Oct., p. 91
Zinc Alloys, Wrought—Oct., p. 93
Engineering Properties of Iron Castings Can Be Improved by Heat Treatment—Dec., p. 50
Extruded Metal Shapes and Their Uses (MATERIALS & METHODS Manual)—Aug., p. 65
Felt, Engineering Properties Make It Useful Material for Industry—Aug., p. 47
Felt Has Wide Use as Engineering Material—Oct., p. 72
Finishes Successfully Baked on Nonferrous Products by Induction Heating—Sept., p. 60
Flame Hardening Now Widely Used for Surface Hardening Steels and Irons—Aug., p. 56

Forming:

Copper Alloys, Tool and Temper Know-How Solve Forming Problems on—July, p. 58
Glass Fiber Preforms, New Laminating Method Reduces Cost of Making—July, p. 71
Molybdenum, How to Fabricate—July, p. 45
Recommended Carbide Grades for Various Applications (File Fact)—Dec., p. 85
Glass Fiber Preforms, New Laminating Method Reduces Cost of Making—July, p. 71
Hard Surfaced Casting for Giant Bit—Nov., p. 138
Heat Resistant Castings—Their Selection and Application (MATERIALS & METHODS Manual)—Oct., p. 79

Heating and Heat Treatment:

Engineering Properties of Iron Castings Can Be Improved by Heat Treatment—Dec., p. 50
Finishes Successfully Baked on Nonferrous Products by Induction Heating—Sept., p. 60
Flame Hardening Now Widely Used for Surface Hardening Steels and Irons—Aug., p. 56
Hot Oil Quenching Reduces Distortion in Hardening of Steel Parts—Nov., p. 62
Highly Corrosion Resistant Spring Material Finds Varied Uses—Sept., p. 54
Hot Oil Quenching Reduces Distortion in Hardening of Steel Parts—Nov., p. 62
Hot Spraying Industrial Organic Finishes, Time, Labor and Materials Saved by—Dec., p. 54
How Can Hardness Values be Used in Design?—Dec., p. 43
How Defense Production Will Affect Materials Supplies—Oct., p. 51
How to Weld Corrosion Resistant Materials—Aug., p. 60
Inspection Method for Metals, A New—Oct., p. 138

Irons:

Electrolytic Iron Powder, A New—Sept., p. 136
Flame Hardening Now Widely Used for Surface Hardening Steels and Irons—Aug., p. 56
Heat Resistant Castings—Their Selection and Application (MATERIALS & METHODS Manual) Oct., p. 79
Iron-Base Heat Treatable Alloy Has Good High Temperature Strength—Oct., p. 65
Welding Electrodes and Rods for Ferrous and Nonferrous Metals (MATERIALS & METHODS Manual)—Dec., p. 67
Low-Melting Alloys, How to Select and Use as Production Aids—Sept., p. 64

Machining and Machined Parts:

Recommended Carbide Grades for Various Applications (File Fact)—Dec., p. 85

Magnesium:

Extruded Metal Shapes and Their Uses (MATERIALS & METHODS Manual)—Aug., p. 65
Magnesium Tubing Spun and Brazed to Produce Critical Part—Nov., p. 65
Mechanical Finishing of Metals—for Decorative Purposes (MATERIALS & METHODS Manual)—Nov., p. 81
Welding Electrodes and Rods for Ferrous and Nonferrous Metals (MATERIALS & METHODS Manual)—Dec., p. 67
Magnesium Tubing Spun and Brazed to Produce Critical Part—Nov., p. 65

Manuals, Materials & Methods:

Ceramics for Engineering Applications—Sept., p. 69
Extruded Metal Shapes and Their Uses—Aug., p. 65
Heat Resistant Castings—Their Selection and Application—Oct., p. 79
Mechanical Finishing of Metals—for Decorative Purposes—Nov., p. 81
Welding Electrodes and Rods for Ferrous and Nonferrous Metals—Dec., p. 67
Mash Resistance Welding Produces Flat Seams in Steel—Oct., p. 77

Materials Data Sheets:

Nickel-Chromium-Molybdenum Steels (File Fact)—Sept., p. 87
Wrought Tin and Aluminum Brasses (File Fact)—Sept., p. 85
Zinc Alloys, Cast (File Fact)—Oct., p. 91
Zinc Alloys, Wrought (File Fact)—Oct., p. 93
Materials Problems in Production Solved with Microscope—July, p. 49
Mechanical Finishing of Metals—for Decorative Purposes (MATERIALS & METHODS Manual)—Nov., p. 81
Metal Parts with High Accuracy and Finish Produced by New Casting Process—Aug., p. 43
Mica Base Paint System Withstands Severe Atmospheric Conditions, New—Nov., p. 58
Molybdenum, How to Fabricate—July, p. 45
New Hard Coating Gains Wear Applications for Aluminum—Aug., p. 62

Nickel and Its Alloys:

Heat Resistant Castings—Their Selection and Application (MATERIALS & METHODS Manual) —Oct., p. 79
How to Weld Corrosion Resistant Materials—Aug., p. 60
Mechanical Finishing of Metals—for Decorative Purposes (MATERIALS & METHODS Manual)—Nov., p. 81
Welding Electrodes and Rods for Ferrous and Nonferrous Metals (MATERIALS & METHODS Manual)—Dec., p. 67
Nickel-Chromium-Molybdenum Steels (File Fact)—Sept., p. 87

Nonferrous Metals:

Extruded Metal Shapes and Their Uses (MATERIALS & METHODS Manual)—Aug., p. 65
Finishes Successfully Baked on Nonferrous Products by Induction Heating—Sept., p. 60
Highly Corrosion Resistant Spring Material Finds Varied Uses—Sept. p. 54
How Defense Production Will Affect Materials Supplies—Oct. p. 51
Low-Melting Alloys, How to Select and Use as Production Aids—Sept., p. 64
Mechanical Finishing of Metals—for Decorative Purposes (MATERIALS & METHODS Manual)—Nov., p. 81
Molybdenum, How to Fabricate—July, p. 45
Precision Investment Nonferrous Casting Alloys (File Fact)—Nov., pp. 97, 99
Welding Electrodes and Rods for Ferrous and Nonferrous Metals (MATERIALS & METHODS Manual)—Dec., p. 67

Nonmetallic Materials and Plastics:

Ceramics for Engineering Applications (MATERIALS & METHODS Manual)—Sept., p. 69
Felt, Engineering Properties Make It Useful Material for Industry—Aug., p. 47
Felt Has Wide Use as Engineering Material—Oct., p. 72
Glass Fiber Preforms, New Laminating Method Reduces Cost of Making—July, p. 71
How Defense Production Will Affect Materials Supplies—Oct., p. 51
Plastic Moldings Find Practical Applications in Many Fields, Large—Nov., p. 68
Plastic Patterns Cut Investment-Casting Cost—Nov., p. 136
Plastic Solves Gasket Problems, Flexible, Corrosion Resistant—Dec., p. 48
Recommended Carbide Grades for Various Applications (File Fact)—Dec., p. 85
Synthetic Fiber Has Many Characteristics of Interest to Industry, New—Sept., p. 59
Thermosetting Laminated Plastic Tubing, Industrial Applications of—Dec., p. 64
Pickling Brittleness in Stainless Steels, How to Reduce—Nov., p. 74
Pickling Causes Brittleness in Stainless Steels, Research Shows How—Oct., p. 58
Plastic Moldings Find Practical Applications in Many Fields, Large—Nov., p. 68

Plastic Patterns Cut Investment-Casting Cost—Nov., p. 136
Plastic Solves Gasket Problems, Flexible, Corrosion Resistant—Dec., p. 48

Plastics (see Nonmetallic Materials)

Powder Metallurgy:

Electrolytic Iron Powder, A New—Sept., p. 136
Stainless Steel Powder, New Type Develops High Green Strength—July, p. 52
Precision Investment Castings Replace Parts Produced by Other Methods—Sept., p. 49
Precision Investment Nonferrous Casting Alloys (File Fact)—Nov., pp. 97, 99
Precision Investment Steel Casting Alloys (File Fact) —Aug., pp. 77, 79
Recommended Carbide Grades for Various Applications (File Fact)—Dec., p. 85
Salt Bath Performs Variety of Cleaning Jobs on Most Metals—July, p. 60

Spinnings and Spinning:

Magnesium Tubing Spun and Brazed to Produce Critical Part—Nov., p. 65
Stainless Steel Powder, New Type Develops High Green Strength—July, p. 52

Steels:

Braze Welding Cuts Costs in Fabrication of Many Products—Sept., p. 56
Compression-Formed Steel Tubing Offers Close Tolerances and High Strength Properties—Aug., p. 52
Contact Welding, Speed and Uniformity in Joining Steel Provided by—July, p. 55
Flame Hardening Now Widely Used for Surface Hardening Steels and Irons—Aug., p. 56
Hot Oil Quenching Reduces Distortion in Hardening of Steel Parts—Nov., p. 62
How Defense Production Will Affect Materials Supplies—Oct., p. 51
How to Weld Corrosion Resistant Materials—Aug., p. 60
Mash Resistance Welding Produces Flat Seams in Steel—Oct., p. 77
Mechanical Finishing of Metals—for Decorative Purposes (MATERIALS & METHODS Manual)—Nov., p. 81
Nickel-Chromium-Molybdenum Steels (File Fact) —Sept., p. 87
Pickling Brittleness in Stainless Steels, How to Reduce—Nov., p. 74
Pickling Causes Brittleness in Stainless Steels, Research Shows How—Oct., p. 58
Precision Investment Steel Casting Alloys (File Fact)—Aug., pp. 77, 79
Stainless Steel Powder, New Type Develops High Green Strength—July, p. 52
Welding Electrodes and Rods for Ferrous and Nonferrous Metals (MATERIALS & METHODS Manual)—Dec., p. 67
Synthetic Fiber Has Many Characteristics of Interest to Industry, New—Sept., p. 59
Teflon Plastic (File Fact)—Aug., p. 81

Testing and Inspection:

Inspection Method for Metals, A New—p. 138
Materials Problems in Production Solved with Microscope—July, p. 49
Testing Machines (Tension and/or Compression) Means of Regulating Testing Speed (File Fact) —July, p. 73
Testing Machines (Tension and/or Compression) Means of Regulating Testing Speed (File Fact)—July, p. 73
Thermosetting Laminated Plastic Tubing, Industrial Applications of—Dec., p. 64

Titanium and Zirconium:

Titanium Metal, Corrosion Resistance in a Number of Chemical Reagents (File Fact)—p. 75
Zirconium Offers Interesting Properties and Possibilities—Oct., p. 63
Titanium Metal, Corrosion Resistance in a Number of Chemical Reagents (File Fact)—July,

Tubing:

Compression-Formed Steel Tubing Offers Close Tolerances and High Strength Properties—Aug., p. 52
Magnesium Tubing Spun and Brazed to Produce Critical Part—Nov., p. 65
Thermosetting Laminated Plastic Tubing, Industrial Applications of—Dec., p. 64
Waste Materials, Wise Use of Results in Significant Savings—Nov., p. 55

Welding and Joining:

Braze Welding Cuts Costs in Fabrication of Many Products—Sept., p. 56
Cold Pressure Welding, Latest Developments Widen Its Field of Application—Nov., p.
Contact Welding, Speed and Uniformity in Joining Steel Provided by—July, p. 55
Hard Surfaced Casting for Giant Bit—Nov.,
How to Weld Corrosion Resistant Materials—Aug., p. 60
Magnesium Tubing Spun and Brazed to Produce Critical Part—Nov., p. 65
Mash Resistance Welding Produces Flat Seams in Steel—Oct., p. 77
Welding Electrodes and Rods for Ferrous and Nonferrous Metals (MATERIALS & METHODS Manual)—Dec., p. 67
Wrinkle Finishes Provide Attractive Durable Coatings—July, p. 65
Wrought Tin and Aluminum Brasses (File Fact)—Sept., p. 85

Zinc:

Zinc Alloys, Cast (File Fact)—Oct., p. 91
Zinc Alloys, Wrought (File Fact)—Oct.,
Zirconium Offers Interesting Properties and Possibilities—Oct., p. 63
